

Supplemental Instructions for English Audio CD Kits

The English Audio CD Kit provides a read-aloud administration of the Grade 3 Reading Achievement Test. This version may be administered to any student whose IEP or 504 Plan specifies an oral reading of the test. Each kit contains the materials needed to administer the test to one student.

Materials Included in the English Audio CD Kit:

- A CD
- A general test booklet
- This sheet of supplemental instructions

Administering a Test Using an English Audio CD Kit

You will need a CD player to administer the test. The test was recorded so that each set of directions and each question, or set of questions, is a separate track. A track listing for the disc is provided on the back of the plastic disc case. Do not allow young children to operate the CD player because it is necessary for the recording to be paused between questions to allow time to respond.

The student should be given as much time as reasonably necessary to respond to the questions. It is acceptable to replay the questions. The student should respond in the general test booklet, which is included in the kit. **All student responses must be in English.**

After the Test Administration

The student's pre-identification label must be placed on the general test booklet. If there is no pre-identification label, you must complete the demographic information on the back cover of the general test booklet. Transcription of student responses is not necessary. Return the general test booklet with the other scorable materials.

Do not add pages or separate sheets to the general test booklet; they will not be scored. Place the CD inside the zip-lock bag and return it to your STC. The bag will be returned with the rest of the school's nonscorable materials.
