

Supplemental Instructions for Large-Print Test Booklet Kits

The large-print version of the Grade 3 Reading Achievement Test is printed in 18-point type. It is for use with students whose IEP or 504 Plan specifies the use of large-print materials.

Materials Included in the Large-Print Kit:

- An 8½-x-11-inch large-print test booklet
- A general test booklet
- This sheet of supplemental instructions

Administering a Test Using a Large-Print Kit

Unless the student's IEP or 504 Plan indicates otherwise, students using the Large-Print Kit may take the test with the rest of their class under normal testing conditions. Ideally, the student should respond directly in the large-print test booklet. If this is not possible, a scribe should record all of the student's responses, writing them verbatim in the general test booklet.

After the Test Administration

If the student responded in the large-print test booklet, the student's multiple-choice and constructed responses must be transcribed verbatim into the general test booklet. This should be done by a licensed/certificated school or district employee. The general test booklet into which the answers were transcribed must be returned to your STC with the other scorable test materials.

The student's pre-identification label must be placed on the general test booklet—not on the large-print test booklet itself. If the student does not have a pre-identification label, you must complete the demographic information on the back cover of the general test booklet.

Do not add pages or separate sheets to the general test booklet; they will not be scored.

Return the large-print test booklet to your STC with the rest of the nonscorable materials.
